Art Unit: 2815

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

- I. Claims 66-69, 71-80, 105, 106, 108-110, 112, drawn to superlattice with a rare earth ion classified in 257 subclass 22.
- II. Claim 70, drawn to a laser system, classified in class 372, subclass 45+.
- III. Claims 81-86, drawn to an optical switch with coupling member and control circuitry, classified in class 359, subclass 237+.
- IV. Claim 87, 113 drawn to an add/drop multiplexier, classified in class 359, subclass 333+.
- V. Claims 88-91, drawn to an NxN cross-connect, classified in class 359, subclass 333+.
- VI. Claim 92, drawn to an optical wavelength converter, classified in class 359, subclass 333+.
- VII. Claim 93, drawn to a dynamic gain equalizer, classified in class 359, subclass 333+.
- VIII. Claim 94, drawn to an integrated transponder, classified in class 359, subclass 333+.
- IX. Claim 95, drawn to an optical multiplexer/demultiplexer, classified in class 359, subclass 333+.
- X. Claims 96-99, drawn to optical waveguides with electronics, classified in class 359, subclass 333+.

Art Unit: 2815

- XI. Claims 100-103, drawn to an optical transistor, classified in class 359, subclass 333+.
- XII. Claim 104, 111 drawn to an optical amplifier, classified in class 359, subclass 237+.
- XIII. Claims 107, drawn to a transponder, classified in class 359, subclass 237+.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerome Jackson Jr. whose telephone number is 571 272 1730. The examiner can normally be reached on t-th 9-5.
